

# I.W.A.I. Corrib Branch

## Certified CPR Course

Every year in Ireland an estimated 5,000 people die suddenly from cardiac arrest when their hearts stop beating. For every minute a person is collapsed without receiving CPR or defibrillation, their chance of survival decreases by between 8-10%. The Committee is purchasing a Defibrillator for use on the lake during our Rallies and other events. We are organizing a course in the use of the Defibrillator and would encourage as many IWAI members as possible to attend and learn this invaluable skill.

**Venue : Classroom upstairs**  
over Dermatology Out-Patients Department  
in the old Ambulance base  
at the back of University Hospital Galway  
(green building, past Mortuary)

**Date:** Wednesday 10<sup>th</sup> April 2013
